

HOMEOWNER RELEASE FORM

Site Assessment: Heating Oil Tank

I, as owner or owner’s authorized representative (hereinafter “owner”) of the real property referenced below, hereby give permission for EcoTech, LLC (hereinafter “EcoTech”) to have access to my property to perform a site assessment by collecting soil samples around an underground storage tank (UST). I understand that if evidence of a fuel release (e.g. leak) from a UST is discovered, EcoTech is required by Oregon law to report such evidence to the Oregon Department of Environmental Quality and that I may be required by the State of Oregon to perform further investigation and/or clean-up at my expense.

I authorize EcoTech to provide a copy of the results of laboratory analysis, site assessment report and/or soil cleanup proposal (if applicable), to the following:

Buyer’s Name: _____

Real Estate Agent Name(s): _____

The location and marking of any underground utilities or other subsurface features is not EcoTech’s responsibility. I will not hold EcoTech responsible or liable for any property damage or any other loss and/or injury caused by inadequately or incorrectly marked utilities. The presence of utilities or features in the work area brought to EcoTech’s attention subsequent to this writing could warrant a change in costs or cause delays and/or repairs that may result in additional costs. EcoTech has arranged for location of underground public utilities for no charge via the Utility Notification Center. By ordering utility location, EcoTech does not assume responsibility or liability for such location. Underground utilities may not be marked on private property beyond the meter (e.g. water supply, electricity, natural gas, etc.) and that location of such utilities is not EcoTech’s responsibility. Work preparatory to the excavation pertaining to or delays resulting from the encountering, disconnection and/or reconnection, relocation, damaging and/or repair of such inadequately or incorrectly marked utilities or other subsurface features could result in additional costs. Property owner will provide EcoTech with access to water and electricity.
